

# DEL DST2000

## Suitable segments

- Supermarket distribution
- Laundry services
- Retail outlets

Engineered for maximum uptime, payload efficiency, and long-term sustainability, our 2000 kg slider lift delivers unmatched lifting power for 12+ tonne vehicles. Combining robust all-weather performance, quick installation, and low-maintenance reliability to boost productivity, reduce operating costs, and extend vehicle lifespan.

## Maximum lifting strength

Designed for the toughest conditions, our 2000 kg capacity slider lift is purpose-built for 12+ tonne vehicles with a robust and durable design.

## Efficient, safe & versatile

Combining quick-acting hydraulics and stable level-ride platform with hinged ramps to increase operational flexibility, safety, and efficiency. Shorter overhang requirements means it fits more vehicle types and accommodates a larger platform than competing lifts in the same space. A fully galvanised steel platform, reinforced steel slide profiles, and integrated rear back stop to prevent the load going underneath the vehicle, deliver superior strength and operator protection.

### DST2000 Specifications

Platform width	2400 mm
Platform depth	1200 - 1300 mm
Lifting capacity	2000 kg
Bed height min/max	1050 - 1520 mm
Platform	Galvanised steel
Weight of complete lift	750 kg*
Max vehicle weight	26 t

\*Standard specification

## Options

Safety	Hinged three-way folding ramps to the side and front of the platform Rear back stop P-gate safety fences Two handed control In/out stow sensor Stow light indicator
Operation	Level ride platform Pre-drilled mounting brackets
Maintenance	Greasable pins Hydraulic unit enclosed in a weatherproof box for added protection
Material	Galvanised steel lift frame Galvanised steel platform and ramps
Installation	Extended power cables

## Maximum uptime & reliability

Pre-assembled with bolt-on, pre-drilled mounting brackets, and a simple electrical system for quick installation and easy maintenance. An 'In & Out' sensor included when safety fences are selected ensures the lift is stowed correctly to reduce damage-related downtime. Backed by our extensive service network, your vehicles stay operational for longer, making it the preferred choice for sectors where uptime and reliability matter most – from supermarket logistics and laundry operations to retail distribution.

## Long-term value

Built for lasting performance and a lower environmental impact with optional solar panels tripling battery life, optimised recyclable materials, energy-efficient, low-emission coating, and a high capacity-to-weight ratio boosting fuel efficiency. Your lift runs cleaner, lasts longer (7-10 years with a 2 year warranty), and delivers maximum uptime and ROI.
