

**TRIED, TESTED AND PROVEN -
HIAB BRICK AND BLOCK**

MADE FOR ALL YOUR MATERIAL HANDLING AND DELIVERY NEEDS

MAXIMISE YOUR PAYLOAD

Take your brick & block deliveries to the next level with the all-new HIAB iX.138 HIDUO, HIAB iX.158 HIDUO, HIAB eX.142 HIPRO, and HIAB eX.162 HIPRO—designed specifically for demanding applications where every kilogram and every second counts. These next-generation loader cranes offer higher capacity, lower weight, and enhanced durability, ensuring you get more payload, more uptime, and more efficiency.

Built for Brick & Block

The BSS-2 configurations are optimized for handling heavy loads with precision and stability. Engineered for high-intensity operations, they feature:

- Optimized Strength-to-Weight Ratio – Up to 370 kg lighter than previous models while delivering up to 14% more lifting capacity, allowing for greater payload on your truck.
- Advanced Boom Design – Hoses, pipes, and cables are routed inside the boom's steel structure for maximum protection, reducing wear and maintenance needs.
- SPACEevo Control System and Olsbergs V200 valve – Standard on all iX.HIDUO and eX.HIPRO models, providing precise, responsive handling and a customizable user experience to enhance operator efficiency.

Power and Flexibility

The HIAB eX.142 HIPRO and eX.162 HIPRO feature optional integrated ePTO, allowing silent, zero-emission operation with a compact battery and power unit mounted directly on the crane base – saving valuable chassis space.

- Unrivalled Warranty for Maximum Uptime 5-Year Warranty on the Steel Structure – Engineered for durability, built to last.
- 2-Year Warranty on Additional Parts – Ensuring reliability and peace of mind.

With nDurance corrosion protection and HIAB's premium build quality, your investment is safeguarded for years of demanding work.

Now you can increase productivity and meet your business challenges with a lighter, stronger HIAB crane, which has more room for your payload.

Maximise your payload

HIAB cranes are designed for situations where maximised payload capacity is required. In building material and brick & block applications, for example.

Familiar and intuitive

HIAB cranes are designed to be easy and reliable to operate. Many of our customers have multi-driver operations, which means all drivers must be able to achieve maximum productivity from HIAB loader cranes.

A durable investment

We know that your business and bottom line come first. When you invest in a HIAB crane the money you spend today will be recouped over time since maintenance needs and breakdowns will be significantly reduced.
